

Fast, reliable and robust Up-linking

TelePhoto Technologies - Defining a new horse-racing industry

From the paddock circle to the finish line, to the off-track wagering venue and all points in between, TelePhoto offers a complete portfolio of cost effective tools and services for race support, TV production, broadcast and content distribution for any track in any market. TelePhoto utilizes the latest broadcast techniques, state-of-the-art equipment and leading edge technology at track level, in the TV control room, and via any data transport medium. This enables TelePhoto to deliver your race broadcast where you want it to go - whether it's upstairs to the dining room, around the corner to the sports and entertainment facility or around the world to partner tracks.

TelePhoto has been a friend and trusted partner to the horse racing industry for nearly 60 years. Having produced over 540,000 "by a nose" posted finishes, provided television production since the inception of television, and streamed & archived over 250,000 live horse races, TelePhoto has unparalleled experience in supporting and enhancing the sport and business of the horse racing industry. TelePhoto understands that the industry benefits from choice and competition by reducing costs and mitigating risk a single vendor may cause.

Satellite Up-Linking
