

TelePhoto Technologies – A Leader in Photo Finishes

With nearly 60 years of photo finish experience, TelePhoto Technologies Inc. has produced more photo finishes than anyone else in North America. TelePhoto has produced over 540,000 “by a nose” posted finishes since 1950 and continues to produce 10,000 more each year. Guided by this experience, TelePhoto has developed an industry-leading photo finish solution that brings the highest standard of integrity to the horse-racing industry world-wide.

ePhoto™

TelePhoto’s digital photo finish solution uses specialized high scan rate digital photography to capture and display, in colour, the order of finish accurately and immediately.

Features

- Full color, high resolution digital images of photo finish.
- Images of finish instantaneously generated.
- Output to multiple video displays.
- Clear and highly visible television output feed.
- High quality LCD officiating display.
- Built in security features.
- Proven technology with easy-to-use interface & customizable options.
- Integrates into existing video-based infrastructure.
- eDisplay can be used to create a slide show of race day photo finishes.

Benefits

- Electronic images can be easily & quickly distributed to multiple locations for review.
- Electronic images can be readily archived online to create a library of past finishes.
- Display can be designed specifically for track.
- Increased speed of posting official results.
- Increased customer confidence in officiating.
- Decreased cost since track no longer has to make hard-copy prints of finishes.
- Slide show of photo finishes can be created for display on track monitors to augment the information provided by race replays.
